

CURRICULUM VITAE ABREVIADO (CVA)

Part A. PERSONAL INFORMATION

First name	Marina		
Family name	Villanueva Barrero		
Gender (*)	Female	Birth date	06/11/1986
Social Security, Passport, ID number	71157614F		
e-mail	marina.villanueva@uva.es		URL Web
Open Researcher and Contributor ID (ORCID) (*)	0000-0001-8342-9360		

A.1. Current position

Position	Assistant Professor		
Initial date	25-01-2022		
Institution	University of Valladolid		
Department/Center	Department of Agriculture and Forestry Engineering	College of Agricultural and Forestry Engineering	
Country	Spain	Teleph. number	686335026
Key words	Physical properties of foods, Food rheology, Food phase transitions, Food quality, Sensory evaluation, Glycemic index, Cereal derivatives, Flours, Doughs, Gels, Bread, Gluten-free		

A.2. Previous positions (research activity interruptions, indicate total months)

Period	Position/Institution/Country/Interruption cause
02-2020/01-2022	PostDoctoral Researcher/Wroclaw University of Economics and Business/Poland
09-2019/02-2020	Adjunct Professor/University of Valladolid/Spain
07-2019/12-2019	Technical Specialist (Research)/University of Valladolid/Spain
12-2018/07-2019	Postdoctoral Researcher/University of Valladolid/Spain
05-2014/05-2018	Predoctoral Researcher/University of Valladolid/Spain

A.3. Education

PhD, Licensed, Graduate	University/Country	Year
PhD Agricultural and Biosystems Sciences and Engineering	University of Valladolid/Spain	2018
MSc in Quality, Development and Innovation in Food	University of Valladolid/Spain	2013
Agronomic Engineering	University of Valladolid/Spain	2012
Agricultural Engineering	University of Valladolid/Spain	2009

Part B. CV SUMMARY

Dr. Villanueva is Assistant Professor and Researcher at the University of Valladolid, Spain. She holds a BSc in Agronomic Engineering, a MSc in Food Quality, Development and Innovation and a PhD in Agri-Food and Biosystems Science and Engineering from the College of Agricultural and Forestry Engineering, University of Valladolid, Spain.

Ever since her master's studies, her entire research career has been focused on the physical chemistry of food carbohydrates, thermal analysis of food constituents, rheological analysis of different food materials, food processing and storage effect on texture, the design and development of structured gluten-free systems, nutritional and functional foods, new clean-friendly technologies for the modification of the main constituents of flours as well as the valorisation of agri-food residues in the context of environmental management and circular

economy. All these experiences have enabled her to acquire extensive scientific knowledge in food rheology and bakery product design and development, especially in the area of gluten-free systems.

Her main research activity has been carried out as a member of the PROCEREALtech research group. But, as part of her research training, she has also worked with Prof. Lazaridou and Prof. Biliaderis at the Aristotle University of Thessaloniki (Greece) and as a postdoctoral researcher at Wroclaw University of Economics and Business (Poland) with Prof. Harasym.

Her research activity has produced 35 international publications in impact journals, 2 book chapter, more than 70 communications to international and national congresses and 2 patents (one of them as part of a university grant, Prometeo 2018 and the other as part of Third Award Innovative Business Idea). In the broad area of Food Science and Technology, she has been involved in 5 research projects funded by International, National and Regional Institutions (one as PI) as well as 22 agri-food industrial collaboration projects.

During her professional career Dr. Villanueva has been granted fellowships in competitive processes, awards and mentions: the Junta de Castilla y León PhD grant, the Alfonso Martín Escudero Foundation postdoctoral grant, the Erasmus+ fellowship, a Cum Laude mention, International Doctorate mention, the Extraordinary Award by her doctorate program and Honorary Alumni UVa, among others.

In addition, she has combined her research activity with teaching activities in the subjects of Basic Operations in Food Industry, Physical Properties of Foods, Sensory Analysis, Oenology Technology, Integrated Practice, New trends in Oenology, Wine-making practices and application of the latest trends. Throughout her academic career, she has supervised 1 thesis (defended in April 2023 with a Cum Laude qualification and international mention), 2 thesis in progress, 19 MSc theses, 1 BSc thesis and 4 industry internships.

Beyond her academic work, Dr. Villanueva is also a committed researcher who gets involved in outreach activities and STEM careers initiatives. Among others, the Conference of Women Researchers in Castilla y León, the #Cuéntame11F initiative to promote STEM careers, and conducting workshops during Science Week and European Researchers' Night. In addition, she is also involved in the researcher's community being an active member of national scientific associations as well as a reviewer of scientific articles in SCI journals in the food area.

51. Ronda, F., Harasym, J., Villanueva, M., García-Solaesa, A., Abebe, W., Caballero, P.A. Microwave assisted heat moisture treatment as useful tool in improvement of gluten-free functional characteristic. Congress FOOD 2030: Towards sustainable agri-food systems, Stuttgart, Germany. 5-6 September 2018. Poster presentation.

C.3. Research projects

1. Molecular and structural changes induced by emerging hydrothermal treatments for functional, sensory and nutritional improvement of gluten-free products. (CleanGFree). (PID2019-110809RB-I00/AEI/10.1303/501100011033). Spanish Ministerio de Ciencia e Innovación. PI: Felicidad Ronda Balbás. 06/2020-05/2024. 133100 €. Work team.
2. Modification of high nutritional gluten-free flours by innovative heat-moisture treatment for the development of improved bakery products (MicroTREAT) (UMO-2020/37/K/ST5/03602). Norway Grants - Narodowe Centrum Nauki (Poland). PI: Marina Villanueva Barrero. 04/2021-01/2022. 125538 €. PI.

3. Application of electromagnetic waves to gluten-free flours for the adaptation of its structure and functionality to the needs of the food industry. Development of better quality products. (Ref: VA072P17). Regional Ministry of Education (JCyL/FEDER). PI: Felicidad Ronda. 2017-2019. 120000 €. Work team. I
4. Impact of microwave and ultrasound on gluten-free flours functionality: structuring ability in gluten-free breadmaking matrices. (AGL2015-63849-C2-2-R). Ministry of Economy and Competitiveness (MINECO/FEDER). PI: Felicidad Ronda. 2016-2020. 84000 €. Work team.
5. Nutritional and functional improvement of gluten-free breads: addition of beta-glucans of different origins and molecular weights according to the health claims approved by the EFSA. (Ref: AGL2012-35088). Ministry of Economy and Competitiveness (MINECO/FEDER). PI: Felicidad Ronda. 2013-2015. 76050 €. Work team.

C.4. Contracts, technological or transfer merits

C.4.1. Patents

1. Rice flour modified by hydrothermal microwave treatment, method of production and uses. Inventors/authors/objectors: Felicidad Ronda Balbás; Marina Villanueva Barrero; Joanna Harasym; Jose Mª Muñoz Muñoz; Pedro A. Caballero Calvo; Sandra Pérez Quirce. Entity: University of Valladolid. Application number: P201830851. Country of registration: Spain. Date of registration: 29/08/2018.
2. Ready-to-eat adapted food product for patients with dysphagia. Inventors/authors/objectors: Pedro A. Caballero Calvo; Felicidad Ronda Balbás; Marina Villanueva Barrero; Joanna Harasym; Ane Arratibel García; Fabiola Juarez Muriel; Elena Roura Carvajal. Entity: University of Valladolid. Application number: 201831386. Country of registration: Spain. Date of registration: 14/09/2018. Companies: Fundación Alicia, Alimentación y Ciencia.

C.4.2. Contracts

1. Laboratory experiences for the industrial implementation of microwave treatment of wheat flour. Project Directors: Jose María Muñoz Muñoz and Marina Villanueva; Company: Corporativo Bimbo S.A. DCV. Period: 2023-2024 (12 months). Project Cost: 28250 €
2. Optimization and validation of the freeze-drying process for edible flowers. Leading Researchers: P.A. Caballero; F. Ronda. Company: Innoflower S.L. Period: 2023. Cost: 2000€
3. Parametrization and technological development of the process of lyophilisation of leaves, buds and edible flowers (FlowerLyoTech). Leading Researchers: P.A. Caballero; F. Ronda. Premio Lanzadera Universitaria-Company: Innoflower S.L. Period: 2023-2024. Cost: 1500€
4. Industrial implementation of technology for microwave treatment of soft wheat flours to improve their baking properties [Implementación industrial de la tecnología de tratamiento de microondas de harinas de trigo de baja fuerza para la mejora de sus propiedades de panificación]. Project Directors: Felicidad Ronda, Pedro A. Caballero, Marina Villanueva; Company: Corporativo Bimbo S.A. DCV. Period: 2023-2024 (12 months). Project Cost: 248434 €
5. Optimization of the treatment process and pre-industrial testing of microwave-treated biscuit flour [Optimización del proceso de tratamiento y realización de prueba pre-industrial con harina galletera tratada con microondas]. Project Directors: Felicidad Ronda; Pedro A. Caballero; Project Director: Felicidad Ronda; Company: Corporativo Bimbo S.A. DCV. Period: 2022-2023 (6 month). Project Cost: 11647 €
6. Integral use of blackberry seeds for the production of superfoods [Aprovechamiento integral de las semillas de zarzamora para la producción de superalimentos]. Project Director: Ángela García Solaesa. Company: Agroberry. Period: 2022-2023 (12 months). Project Cost: 12000€
7. Determinación de los estándares de calidad de las semillas de cáñamo para su uso agroalimentario. Project Director: Pedro A. Caballero, Company: CANNALIZA. Period: 2022-2024 (25 months). Project cost: 2500€.

8. Development of new food products through the integral use of natural pistachio nuts (PISTACHIO FOODS) [Desarrollo de nuevos productos alimenticios mediante el aprovechamiento integral del pistacho natural (PISTACHIO FOODS)]. Project Directors: P.A. Caballero; F. Ronda. Premio 3ª Convocatoria de financiación de proyectos de innovación rural para ayuntamientos de la provincia de Valladolid. Company: Pistacyl S.L. Period: 2021-2022. Project Cost: 8000 €
9. Optimization of the Physical Modification Process of Wheat Flour through Microwave Assisted Treatments to Improve its Baking Performance. Project Director: Felicidad Ronda; Company: Corporativo Bimbo S.A. DCV. Period: 2020-2021 (9 months). Project Cost: 34222 €
10. Parametrization, Technological Development and Validation of the Freeze-Drying Process for Edible Leaves, Shoots and Flowers. Project Director: Felicidad Ronda; Company: INNOFLOWER. Period: 2021-2023 (23 months). Project Cost: 12000 €
11. Characterisation of hemp seed varieties and by-products approved for production in castilla y león (Superhealthy) [Caracterización de variedades de semillas de cáñamo y sub-productos aprobadas para su producción en Castilla y león (Superhealthy)]. Project Directors: F. Ronda; P.A. Caballero; Premio Lanzadera Universitaria-Trasformación y aprovechamiento de semillas de cáñamo producidas en la provincia de Palencia para la producción de superalimentos. Company: José Manuel Miguel Castrillo. Period: 2020-2021 (8 months). Project Cost: 3825 €
12. Parameterisation of the freeze-drying process and study of the biological activity of freeze-dried edible flowers [Parametrización del proceso de liofilización y estudio de la actividad biológica de las flores comestibles liofilizadas]. Project Director: Felicidad Ronda; Pedro A. Caballero. Company: INNOFLOWER. Period: 2020-2021 (10 months). Project Cost: 3000 €
13. Shelf life study of gluten-free bread [Estudio de vida útil de pan sin gluten]. Project Director: Felicidad Ronda; Company: AMARITTA FOODS S.L. Period: 2020-2020 (1 months). Project Cost: 475,29 €
14. Second proof of concept: Applicability of physical treatments to wheat flour. Project Director: Felicidad Ronda; Company: Corporativo Bimbo S.A. DCV. Period: 2020 (4 months). Project Cost: 6205 €
15. Development of high quality baked products. Own Innovation Plan [Desarrollo de productos horneados de alta calidad. Plan de Innovación propio]. Project Director: Felicidad Ronda; Company: Fundación Parque Científico de la Universidad de Valladolid. Period: 2019-2020 (2 months). Project Cost: 5252 €
16. Proof of concept: Applicability of physical treatments to improve the baking properties of common wheat. Project Director: Felicidad Ronda; Company: Corporativo Bimbo S.A. DCV. Period: 2019 (2 months). Project Cost: 5252 €
17. Study of the agri-food transformation of the canary seed (*Phalaris canariensis* L.) as a tool for rural development in the province of Palencia. Project Director: Pedro A. Caballero; Company: Fitopal S.L. Period: 2017-2018 (5 months). Project Cost: 3000 €
18. Optimization of the pre-treatment and packaging processes of natural pistachio. Project Director: Pedro A. Caballero; Company: Sociedad Cooperativa PISTACYL. Period: 2017 (5 months). Project Cost: 6611,57 €
19. Fortification of bread with beta-glucans [Enriquecimiento de pan con beta-glucanos]. Project Director: Felicidad Ronda. Company: Biofactoría Natura et Salus S.A. Period: 2015 (1 month). Project Cost: 2541€.
20. Flour analysis [Análisis y estudios de harinas]. Project Director: Felicidad Ronda; Company: Grupo Ordesa, S.A. Period: 2014-2015 (12 months). Project Cost: 920 €.
21. Study of starch digestibility of flour samples. Project Director: Felicidad Ronda; Company: Grupo Ordesa, S.A. Period: 2014-2015 (12 months). Project Cost: 400 €.
22. Effect of the formulation of infant flours in starch digestibility. Project Director: Felicidad Ronda; Company: Grupo Ordesa, S.A. Period: 2014. Project Cost: 1260 €.

C.5. Direction of research activities

1. Supervision of PhD. Thesis: Physical modification of gluten-free flours by ultrasound treatments. Application to the development of new products suitable for the celiac population. University of Valladolid. College of Agricultural and Forestry Engineering.

Antonio José Vela Corona. 13 April, 2023 – Sobresaliente Cum Laude; International Mention. Extraordinary award in application period.

2. Doctoral theses that are in progress under my supervision:

“Physical modification of cereal gluten-free grains and flours by hydrothermal treatment assisted by microwaves”. UVa. Caleb Samir Calix Rivera.

“New technologies applied to the physical modification of high nutritional value grains and flours to reduce the glycaemic response of gluten-free products”. UVa. Muriati Muriati

3. Supervisor of:

Degree Thesis: 1

Master Thesis (Ms. in Food Quality, Development and Innovation): 19

Industry internships: 4

C.6. Research stays abroad

1. Postdoctoral stay funded by Fundación Alfonso Martín Escudero at Wroclaw University of Economics, Department of Biotechnology and Food Analysis with Prof. Joanna Harasym, from January 2020 to January 2022.
2. Postdoctoral stay at the Department of Biotechnology and Food Analysis with Prof. Joanna Harasym, from 2 September to 13 October 2019.
3. Erasmus+ training stay at Wroclaw University of Economics, Department of Biotechnology and Food Analysis with Prof. Joanna Harasym, from 26 to 30 August 2019.
International stay at Aristotle University of Thesaloniki, Department of Food Science & Technology (Greece) with Prof. C. Biliaderis: from June 2015 to October 2015.

C.7. Other merits

1. First Prize “Desafío Universidad-Empresa” por el proyecto: “Aprovechamiento integral de semillas de zarzamora para la producción de superalimentos (ZaMoraFoods)”.
2. Participation as a researcher in different scientific workshops: Science Exhibition, Science Week, children's workshops, Feria de Ciencia Sostenible, etc. Participation in scientific-technical conferences to support women in the field of research.
3. Attendance to different courses and conferences in the scientific-technical field related to the lines of my research.
4. Participation as a researcher (organization and teaching) in the workshop "Con las manos en la masa" during the 13th European Researchers' Night, held at the Science Museum of Valladolid on September 2018.
5. Participation as a researcher in the "European Corner: Valladolid Researches", an exhibition of the projects with European funding, during the 12th European Researchers' Night, held in the Science Museum of Valladolid on September 2017.
6. Third Prize "IDEA INNOVATIVE BUSINESS" in the 2017 edition of the INITIATIVE CAMPUS ENTREPRENEURSHIP CONTEST for the project "Development of a range of products adapted to the population with dysphagia".
7. Beneficiary of the PROMETEO Programme for the development of market-oriented prototypes, promoted by the General Foundation of the University of Valladolid (FUNGE).
